

Silect Software Announces Free Edition of MP Studio Delivering Support for Microsoft System Center Operations Manager 2007

Free edition of MP Studio enables efficient reporting and analysis of System Center Operations Manager 2007 Management Packs

SAN DIEGO – April 29, 2008-- Silect Software Inc., a provider of management solutions for Microsoft environments, today announced a free edition of its industry leading MP Studio product. **MP Studio Lite** helps organizations quickly develop a clear understanding of Management Packs, a key component of System Center Operations Manager 2007. **MP Studio Lite** combines rich Management Pack content analysis capabilities with predefined out-of-the-box Management Pack reports giving System Center Operations Manager 2007 users a comprehensive view of all Management Pack components.

Jack Courville, Director of Information Technology at Ergosence thinks MP Studio Lite will be a popular download. "MP Studio Lite helps me understand exactly how System Center Operations Manager 2007 is being used within our environment. We can quickly identify the configuration of System Center Operations Manager rules, monitors and overrides. If you're using System Center Operations Manager, I highly recommend you download MP Studio Lite."

"Knowledge-driven IT management is fundamental to reducing costs, improving application availability and enhancing service delivery," said Robert Reynolds, director of System Center product management at Microsoft Corp. "We are pleased that Silect Software is making a free edition of its MP Studio product available for System Center Operations Manager 2007, as this will make it easier to create knowledge and improve time to value for our customers."

MP Studio Lite allows users to work with either installed Management Packs or file-based Management Packs. Users can view the relationships between Management Packs as well as view all Management Pack content including rules, monitors, overrides, modules, views, tasks and more. MP Studio Lite provides rich, customizable analysis tools to quickly turn Management Pack details into an understanding of exactly what the Management Pack does.

MP Studio Product Family

In addition to MP Studio Lite, MP Studio is available in 3 other editions:

MP Studio Enterprise edition: Enables full lifecycle support for System Center Operations Manager 2007 Management Packs including development, deployment and maintenance to further help customers maximize the return on their System Center Operations Manager investments.

MP Studio Professional edition: Provides Management Pack analysis, reporting, editing and tuning capabilities;

MP Studio Express edition: MP Studio Express delivers efficient reporting and analysis of System Center Operations Manager 2007 Management Packs;

“We are pleased to make a free edition of MP Studio available to all System Center Operations Manager users” says Randy Roffey, Product Manager at Silect Software. “Now everyone who works with Management Packs will be able to leverage MP Studio Lite’s rich analysis and reporting capabilities to further their understanding of all aspects of a Management Pack.”

MP Studio Lite is available for download now from <http://www.SystemCenterCommunity.com> and from <http://www.silect.com>.
